DETAILED ACTION

1. Claims 1 – 12 are presented for examination.

Claim Rejections - 35 USC § 102

2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
3. Claims 1 – 12 are rejected under 35 U.S.C. 102(e) as being anticipated by Quatrano et al. U.S. Patent No. 6748420 (hereinafter Quatrano).
4. Referencing claim 3, as closely interpreted by the Examiner, Quatrano teaches a host system connected by a network to a support host having a support services resource, the host system comprising:
 5. at least one application having a support module for receiving a user request, (e.g. col. 24, lines 33 – 46 & col. 21, lines 30 – 57); and
 6. a first support interface module comprising:
 7. a session handler for receiving the user request from the support module and for controlling the activities of the first support interface module, (e.g. col. 23, lines 12 – 26);
 8. at least a first session generated by the session handler for processing the user request, (e.g. col. 23, lines 12 – 26);

Art Unit: 2143

9. a first transport handler initialized by the at least a first session for managing communications with the support host, (e.g. col. 23, lines 12 – 26); and
10. at least a first transport generated by the first transport handler for communication of the at least a first session with the support services resource, (e.g. col. 23, lines 41 – 55),
11. wherein said support services resource provides information to aid a user of said at least one application, , (e.g. col. 23, lines 41 – 55, “*the shared session participant cookie and the shared session cookie ...*”).
12. Referencing claim 4, as closely interpreted by the Examiner, Quatrano teaches the at least a first session comprises an application programming interface through which the at least a first session cooperates with the support module to process the user request, (e.g. col. 23, lines 12 – 22).
13. Referencing claim 5, as closely interpreted by the Examiner, Quatrano teaches a second support interface module comprising:
 14. at least a second session generated by the session handler for processing a user request, (e.g. col. 9, lines 44 – 64);
 15. a second transport handler initialized by the at least a second session for managing communications with the support host, (e.g. col. 9, lines 44 – 64); and
 16. at least a second transport generated by the second transport handler for communication of the at least a second session with the support services resource, (e.g. col. 9, lines 44 – 64).

Art Unit: 2143

17. Referencing claim 6, as closely interpreted by the Examiner, Quatrano teaches the at least a second session comprises an application programming interface through which the at least a second session cooperates with the support module to process the user request, (e.g. col. 26, line 55 – col. 27, line 4).

18. Referencing claim 8, as closely interpreted by the Examiner, Quatrano teaches terminating the at least one session when the service request is either satisfied or withdrawn, (e.g. col. 26, lines 1 – 21).

19. Referencing claim 10, as closely interpreted by the Examiner, Quatrano teaches a support interface module, in a host system, comprising:

20. means for receiving a service request from the support module of an application interface of an application in the host system, (e.g., col. 21, lines 30 – 57);

21. means for establishing overall control of the service request process by the support interface module, (e.g., col. 21, lines 30 – 57);

22. means for generating at least one session for the service request by the support interface module, (e.g., col. 14, line 61 – col. 15, line 7 & col. 21, lines 30 – 57);

23. means for initializing communication control of the service request process by the support interface module, (e.g., col. 14, line 61 – col. 15, line 7 & col. 21, lines 30 – 57);

24. means for generating at least one transport for the at least one session by the support interface module, (e.g., col. 14, line 61 – col. 15, line 7 & col. 21, lines 30 – 57); and

Art Unit: 2143

25. means for transmitting and/or receiving data via the at least one transport by the support interface module, (e.g., col. 14, line 61 – col. 15, line 7 & col. 21, lines 30 – 57), wherein said support module is for communication between the host system and a support system over a network, and said support system includes a support services resource, (e.g., col. 14, line 61 – col. 15, line 7 & col. 21, lines 30 – 57).

26. Claims 1, 2, 7, 9, 11 and 12 are rejected for similar reasons as stated above.

Response to Arguments

27. Applicant's arguments with respect to claims 1 – 12 have been considered but are moot in view of the new ground(s) of rejection.

28. Applicant is advised to contact the Examiner to discuss claim interpretation and possible claim amendments to expedite prosecution.
